

Model 651. High performance flowmeter regulator

Applications:

It is mostly used for advanced gas shielded welding applications, where it will reduce the total welding cost by decreasing the gas consumption by up to 50%. In addition, reduced porosity sensitivity improves weld quality.

Features:

- ▶ Conform to ISO 2503
- ▶ Forged brass body and bonnet for maximum strength
- ▶ Inlet filter to stop impurities
- ▶ Accurate pressure compensated design flowmeter for precise flow
- ▶ High performance for great consumption saving by up to 50%
- ▶ Flowmeter with easy to read polycarbonate outer tube cover for strength and 360°
